Product Discontinuation Announcement – Hirschmann connectivity miscellaneous products which use blue plastic material

Dear Valued Customer,

This letter serves as formal notification for the discontinuation of miscellaneous products identified in this notice.

This decision follows a comprehensive review of our product portfolio and is part of an ongoing initiative to streamline our offerings by discontinuing products with limited demand. These changes allow us to maintain a more focused and efficient product portfolio while continuing to support our customers' application needs.

Affected Series:

- M12 Data
- ST Series

The affected products utilize specific blue plastic compound that is no longer available. As a result, Belden will discontinue this material from its product offering and the affected products due to the material's limited availability and the low demand for these products.

Belden will not offer a standard replacement or alternative product for the affected products. However, customers with an ongoing application need may contact Belden Product Management to discuss potential alternatives or substitution options.

We sincerely appreciate your trust and continued partnership with Belden. If you have any questions or require additional information regarding this notification, please contact your local Belden sales representative.

Sincerely,

Hirschmann Automation and Control GmbH

Ryan Smith, PMP

Senior Product Manager
