

# Belden data center portfolio support areas

## Campus

Industrial-grade networking, cybersecurity, and infrastructure solutions to connect and secure campus-wide systems.

## White space

High-density, AI-ready racks and cabinets as well as power distribution, cooling, structured cabling, environmental monitoring, aisle-containment systems manufactured locally in the U.S. and sourced regionally worldwide.

## Facilities & infrastructure

Vendor-agnostic automation and control solutions for heat rejection, cooling, and power management.

## Administrative areas

Networking, cybersecurity, and infrastructure solutions to safely integrate critical data center systems like fire alarms, access control, and environmental monitoring.
