

Innovation in every connection

> About us

Founded in 1902 by Joseph C. Belden, we began by supplying insulated wire that powered early telephones, radios, and even the first televisions. Today, after 120+ years of strategic growth and groundbreaking innovation, Belden has transformed into a provider of complete connection solutions that drive digital transformation in demanding vertical markets around the globe.

> What we do

Belden unites a network of expert engineers and trusted partners to solve complex challenges with precision. We combine best-in-class products, software and services into an integrated approach that optimizes data infrastructure and connects IT and OT environments for seamless performance. With a strong focus on innovation, we work closely with partners to turn ideas into meaningful, real-world outcomes.

> Our purpose

At Belden, we believe that better connections unlock untold possibilities. So, we advance ideas and technologies that enable a safer, smarter and more prosperous future for your business.

Enabling smarter business decisions through IT and OT convergence

Why is IT/OT convergence essential today?

Enterprises can no longer rely on isolated IT and OT networks, as modern operations demand real-time data, seamless interoperability and security across the entire organization. Without a unified architecture, organizations run a risk of misaligned goals, conflicting approaches and hidden vulnerabilities that lead to costly risks. Convergence enables selective data sharing, accurate visibility and faster decision-making, unlocking the full value of production information.

Why do businesses trust Belden with their IT/OT convergence journey?

We help customers unlock the full potential of IT/OT convergence by meeting them wherever they are on their transformation journey. As AI-driven applications, autonomous systems and advanced data use cases accelerate the need for IT and OT to work as one, we bring deep OT strength and strong IT access to deliver unified network and data solutions tailored to each vertical and application. Every engagement shows that when Belden enables a converged environment, businesses gain impactful new outcomes and significantly greater value from their daily operations.

Industry Solutions

Belden has developed specialized expertise across a range of industries. Connect with us to see how our solutions can help you.

Our Core Capabilities

Explore the many areas of expertise Belden can bring to your challenge.

Scan me →

Network capabilities

Edge Computing

Empower people to access, analyze and act on information.

Network Convergence

Meet IT and OT priorities while enabling secure, data-driven insights.

Network Resilience

Deliver consistent quality of service—no matter what.

Network Slicing

Allocate network resources based on needs and priorities.

Data capabilities

Data Anomaly Detection

Automate monitoring to improve productivity and performance.

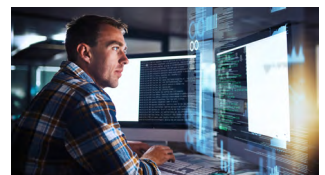

Data Contextualization

Build a foundation for quality performance insights.

Data Interoperability

Achieve plant-wide data visibility to improve production performance.

Data Provisioning

Streamline data sharing and accelerate access to analytics.

Our Products

Belden connects and protects with complete connection solutions. Explore our vast product portfolio – the building blocks for your tailored network infrastructure.

Cable

- Armored Cable
- Audio Cable
- Broadcast Cable
- Coax & Triax Cable

- Control Cable
- Electronic Wire & Cable
- Ethernet Cable
- Fiber Optic Cable
- Fieldbus Cable
- Flex Cable

- Instrumentation Cable
- Power Cable
- Safety, Sound & Security
- Tray & TC Cable
- VFD Cable
- Video Cable

Connectors

- AV Multimedia Modules
- Coaxial Connectors
- Copper RJ45 Connectors

- Fiber Adapters
- Fiber Connectors
- Industrial Connectors

I/O Systems

- Digital I/O Modules for Fieldbus Systems
- Digital I/O Modules for Industrial Ethernet

- IO-Link Master
- IO-Link Hubs

- Passive Distribution Modules
- Safety I/O Modules

Industrial Networking & Cybersecurity

- Accessories
- Cybersecurity
- Edge Devices
- Fiber Interfaces

- Managed Switches
- MPLS Networks
- Serial Communication
- Software Solutions

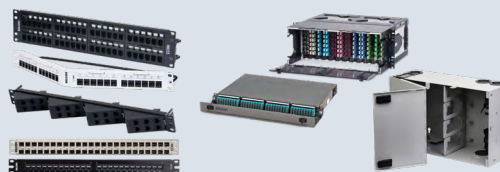

- Unmanaged Switches
- Wireless

Panels & Patching Systems

- Broadcast Panels & Enclosures
- Copper Cross-Connect Systems

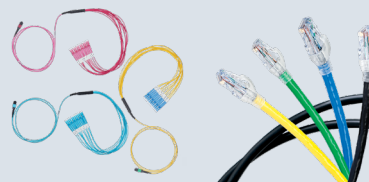

- Fiber Patch Systems
- Intelligent Patching Systems
- RJ45 Patch Panels
- Wallplates & Boxes

Patch Cords, Cordsets & Assemblies

- Broadcast & AV Assemblies
- Copper Pre-Term Assemblies

- Fiber Pre-Term Assemblies
- Industrial Cordsets

Racks, Cabinets & Cable Management

- Cable Management
- Enclosures

- Heat Containment Systems
- Power Distribution and PDUs

- Rack & Cabinet Accessories
- Racks & Cabinets

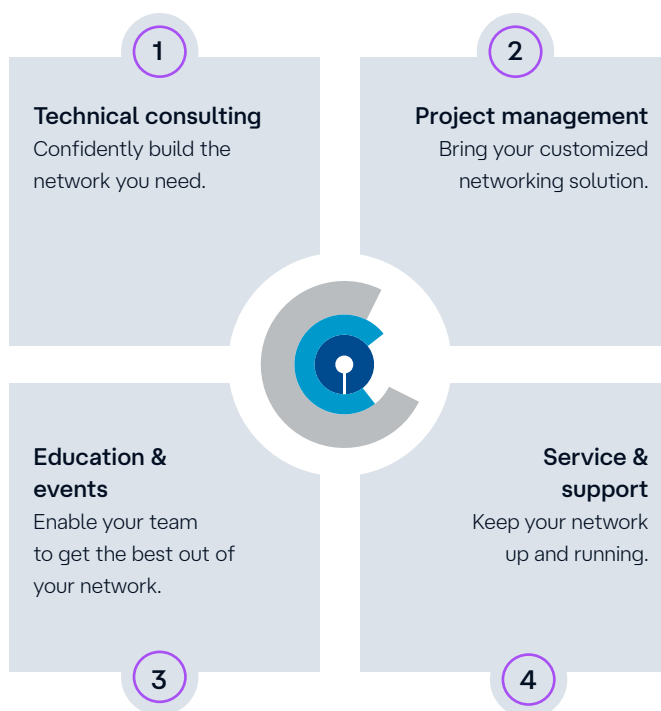

Customer Innovation Centers

Belden's Customer Innovation Center™ locations serve your needs throughout the solution development lifecycle.

These hubs – strategically located to serve regions throughout the world – offer access to best-in-class capabilities, including the opportunity to run a proof-of-concept in our validation lab.

Our services

>>> Design

Whether you need to prepare your network for IT/OT convergence, bolster data collection or improve cybersecurity, Belden's network design services help you seize new opportunities.

>>> Hypercare

Once your new system, process or technology is in place, make sure you have a plan to address any issues that may arise in the short term as your organization adapts.

>>> Install

Once your tailored network design is ready, Belden's network installation services bring it to life.

>>> Run & maintain

Downtime isn't an option in mission-critical environments where every millisecond counts. Belden's Run & Maintain services keep your network and its connected systems operational.

Why Belden?

Belden connects people, information and ideas to address not only your technical network needs, but the broader business challenges behind them.

>>> An ecosystem of experts

Gain access to a network of talented engineers and best-in-class partners, working as one to solve your challenge.

>>> Infrastructure that unlocks what's possible

Maximize the value of your data with infrastructure that merges IT and OT worlds and helps disparate systems work in harmony.

>>> A pathway to innovation

From incremental improvements to game-changing innovations, partner with us to turn your vision into reality.

Connect to what's possible.

About Belden

Belden Inc. delivers complete connection solutions that unlock untold possibilities for our customers, their customers and the world. We advance ideas and technologies that enable a safer, smarter and more prosperous future. Throughout our 120+ year history we have evolved as a company, but our purpose remains – making connections. By connecting people, information and ideas, we make it possible. We are headquartered in St. Louis and have manufacturing capabilities in North America, Europe, Asia and Africa.
