## Declaration for California Proposition 65

Dear customer,

During normal operations it is not required to touch our products in any way. For the down listed articles of Hirschmann Automation and Control GmbH we can give the following statement to the best of our knowledge:  
Under the structure of California's Safe Drinking Water & Toxic Enforcement Act of 1986 (Proposition 65 (Prop 65)) none of the substances, with exception of lead, are included in the items produced by Hirschmann and listed below. Under normal conditions of use, the lead does not free up from the product. Please note, however, that up to 3% lead may be present in brass alloy spacers. These brass alloy spacers are not intended to be touch by the users, so we exclude oral absorption of lead and have not marked the products, which are intended for commercial use, only.

This information is based on the Prop 65 chemical list as of the date of this letter.

Best regards
