Corporate Sustainability Reporting Directive (CSRD) ESG Regulatory Reporting Requirements

Belden is committed to understanding and complying with ESG-related regulations and frameworks across the globe. As these frameworks are introduced and continue to evolve, we are dedicated to staying up to date with relevant regulations.

Corporate Sustainability Reporting Directive (CSRD) is a reporting directive put forth in the European Union that expands disclosures across environmental, social, and governance topics. Belden is working on adhering to CSRD starting in 2025. We plan to release our first disclosure in 2026.

More information about our ESG program can be found on our [website](#).
