

4 ways Wi-Fi powers next-gen warehousing solutions

Infographic

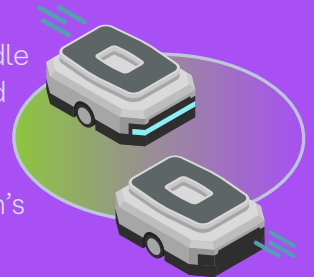

1 Up and running with ease

Wi-Fi delivers reliable, protocol- and device-agnostic connectivity that streamlines deployment—perfect for varied warehouse needs.

2 Release the robots

Wi-Fi's expanding bandwidth supports resilient networks that handle growing automated robot fleets—no extra channels needed with Belden's Wi-Fi 6 solution.

3 Cost-effective redundancy

Wi-Fi automatically shifts channels or access points to avoid overloads, offering built-in redundancy at a lower cost than private 5G.

4 Fast times on the floor

Wi-Fi's fast roaming and smart design keep disruptions under 20 milliseconds, reducing dropped data packets and downtime.
