The Building Automation Switch offers electricians a reliable, cost-effective solution to meet the specific electrical installation requirements for commercial and non-residential smart buildings, as well as smart homes.

- **Saves time and space** during installation by fitting directly into standard electrical distribution enclosures
- **Eliminates the need and cost** for a separate power supply by embedding Power over Ethernet (PoE) functionality
- **Provides fast, reliable Ethernet communication** through 8 Fast Ethernet speed ports

**Key Features**

- Special form factor for easy installation
- 8 ports (Fast Ethernet variants)
- PoE enabled, with a total power budget of up to 110 W
- Ethernet speeds up to 100 Mbit/s
- Integrated 110/230 V power supply
- Operating temperature range of -5°C to +60°C
- Meets electrical installation requirements in commercial/non-residential buildings and smart homes

Unmanaged switch with embedded power supply and optimized housing for use in electrical installation environments.
Your Benefits

Designed specifically for use in smart building automation, the Building Automation Switch fits directly into the electrical distribution board, making it easier and more efficient to install. And with its own power supply, the switch is cost effective and saves more space than any other unmanaged switches on the market. Equipped with 8 ports, including PoE options, the Building Automation Switch offers multiple variants and can support Ethernet speeds of up to 100 Mbit/s.

Applications

As smart buildings enable more automation, there is a trend towards PoE-powered controllers instead of separate power cables, introducing a need for a reliable and cost-effective switch. The Building Automation Switch provides reliable connection to end devices and can be installed directly in the electrical distribution board.

The switch is also an ideal solution for door-entry systems and video surveillance where reliable Ethernet speeds are needed to transmit high-resolution video streams.

Markets

The Building Automation Switch is ideal for smart building applications where IP-enabled controllers and sensors are being powered by PoE. This includes smart homes and buildings, casinos, hotels, and hospital systems.

Additionally, the switch is suited for factory automation environments in which standard modular DIN-rail form factor is required.
**Technical Information**

**Product Description**

<table>
<thead>
<tr>
<th>Type</th>
<th>Building Automation Switch (BAS)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>Unmanaged Ethernet Switch for Building Automation Applications with MDRC form factor</td>
</tr>
<tr>
<td>Port Type and Quantity</td>
<td>Fast Ethernet, 8 x 10/100BASE TX/RJ45 AC HV Non-POE</td>
</tr>
<tr>
<td></td>
<td>Fast Ethernet, 8 x 10/100BASE TX/RJ45 with PoE, 55W Power Budget, AC HV</td>
</tr>
<tr>
<td></td>
<td>Fast Ethernet, 8 x 10/100BASE TX/RJ45 with PoE, 110W Power Budget, AC HV</td>
</tr>
</tbody>
</table>

**Interfaces**

| Power Supply/Signaling Contact | 6 poles, Nominal cross section max 1.5 mm², no signal contact |

**Power Requirements**

<table>
<thead>
<tr>
<th>Operating Voltage</th>
<th>100 V AC - 230 V AC, 50/60 Hz</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Consumption</td>
<td>BAS20-8TX-HV 1.4 W 4.8 BTU/h</td>
</tr>
<tr>
<td></td>
<td>BAS22-8TX-HV-55 2.5 W 8.6 BTU/h (without PoE)</td>
</tr>
<tr>
<td></td>
<td>BAS22-8TX-HV-110 2.5 W 8.6 BTU/h (without PoE)</td>
</tr>
<tr>
<td></td>
<td>- 66 W 226 BTU/h (inc. 55 W PoE)</td>
</tr>
<tr>
<td></td>
<td>- 126 W 430 BTU/h (inc. 110 W PoE)</td>
</tr>
</tbody>
</table>

**Power Consumption**

- without PoE: FE 2 W - PoE add 1 W + 10% of PoE Load

**Service**

**Diagnostics**

- LEDs (power, link/activity status, POE)

**Ambient Conditions**

| Operating Temperature | -5°C to + 60°C derating at PoE total power > 90 W for 110 W Variant, 48 W for 55 W variant |
| Storage/Transport Temperature | -40°C to +85°C |
| Relative Humidity (non-condensing) | working humidity 20% to 90%; storage humidity 10% to 95% |

**Mechanical Construction**

| Dimensions (W x H x D) | 140 mm x 90 mm x 64 mm non PoE |
|                       | 210 mm x 90 mm x 64 mm PoE |
| Mounting              | DIN Rail |
| Weight                | Non PoE Variants: 250 g; PoE Variants: 410 g |
| Protection Class       | IP20 |

**Mechanical Stability**

- IEC 60068-2-27 shock: 15 g peak, 11 ms, half-sine
- IEC 60068-2-6 vibration: 3.5 mm, 5 Hz to 8.4 Hz, 10 cycles, 1 octave/min. 1 g, 8.4 Hz to 150 Hz, 10 cycles, 1 octave/min.

**EMC Interference Immunity**

- EN 61000-4-2 electrostatic discharge (ESD): 4 kV contact discharge, 8 kV air discharge, ±4 kV Horizontal and Vertical Coupling Planes
- EN 61000-4-3 electromagnetic field: 10 V/m (80 MHz - 1 GHz), 3 V/m (1.4 GHz - 6 GHz)
- EN 61000-4-4 fast transients (burst): 2 kV Power Line, Data Line: 2 kV (SF/UTP CAT5), 1 kV (U/UTP CAT5) As per HAC quality requirement 4 kV STP(B), 2 kV UTP(B)
- EN 61000-4-5 surge voltage: Power Line: 2 kV (Line/Earth) 1 kV (Line/Line); Data Line: 1 kV (SF/UTP CAT5), 1 kV (U/UTP CAT5)
- EN 61000-4-6 conducted immunity: 10 V (150 KHz - 80 MHz) Power Line + Data Line (SF/UTP CAT5, U/UTP CAT5)
- EN 61000-6-2 industrial environments: Class A
