California ESG Regulatory Reporting Requirements

Belden is committed to understanding and complying with ESG-related regulations and frameworks across the globe. As these frameworks are introduced and continue to evolve, we are dedicated to staying up to date with relevant regulations.

We are aware of California's new regulations around climate – Assembly Bill (AB) 1305, Climate Corporate Data Accountability Act (SB 253), and Climate-Related Financial Risk Act (SB 261). We are making dedicated efforts on the topics included in these bills and are working towards providing our first disclosure in 2026.

More information about our ESG program can be found on our website.

Regards,

Brian Anderson Senior Vice President – Legal, General Counsel and Corporate Secretary
