Why choose our services?

- **Trusted expertise:** Our team offers over 120 years of cross-industry experience.
- **Customized solutions:** Services tailored to meet your specific challenges and goals.
- **Collaborative partnership:** We shape solutions around your insights and objectives, driving innovation and impactful results.
- **Integrated approach:** Our services are woven into Belden's connected solutions, ensuring value at every stage.

Service offering *	Overview
Network Assessment	Identify performance bottlenecks and uncover improvement opportunities with a comprehensive review of your network infrastructure.
Add-on: Routing Assessment	Analyze your network's routing configuration, segmentation, and redundancy to ensure it meets your current and future needs.
Add-on: Wireless Assessment	Evaluate your existing wireless network coverage, capacity, and security to ensure it meets your current and future needs.
Add-on: Physical Assessment	Inspect your physical network infrastructure to ensure it meets industry standards and future needs.
Wireless Site Survey	Design or validate optimal coverage, AP placement, and signal strength onsite for your new wireless installations.
Workflow Assessment	Identify inefficiencies in your system workflows and uncover opportunities to enhance operational performance.
Solution Blueprint	Receive a high-level solution proposal with costs and implementation roadmaps to make an informed decision before major investment.
Solution Design	Receive a complete design package (BoM, IP lists, segmentation plans, etc.) to ensure a smooth, efficient, and predictable deployment.
Proof of Concept	Test and validate your proposed solution in a controlled environment to confirm its performance and feasibility before full-scale deployment.
Installation Services	Ensure your hardware is installed safely and correctly according to industry standards.
Configuration Services	Set up your hardware and/or software to meet specific performance, functionality, and application requirements.
Commissioning Services	Verify your newly installed systems to ensure they perform exactly as designed.
Factory Acceptance Test	Verify your solution meets all specifications and performance standards at our facility before it is delivered to your site.
Site Acceptance Test	Confirm your installed solution meets all operational requirements at your site with validation testing.
Remote Technical Support	Receive remote technical support, troubleshooting, and maintenance for Belden products and solutions.
Onsite Technical Support	Receive technical support, troubleshooting, and maintenance for Belden products and solutions at your facility.
Resident Engineer	Place a dedicated Belden technical expert at your site for deep expertise, rapid response, and proactive support.
Customized Training	Tailor training programs to upskill your team with the knowledge needed to deploy, operate, and maintain Belden solutions.
Certification Training	Validate your knowledge and certify proficiency in Belden solutions through Belden's training and certification exams.
SLA Packages	Choose a tiered support agreement with guaranteed response times and proactive services to ensure your operational continuity.

Our services are designed to complement and enable Belden's solutions, delivering end-to-end support across every stage of your project—from planning and design to implementation, optimization, and ongoing performance.

Ready to maximize your potential?

[Contact us or your local Belden sales representative](#) to learn how our services can transform your operations.

*Services are subject to regional and industry-specific limitations.

*Select services are delivered through Belden's trusted partners to ensure quality and local expertise.

*Most services are delivered as part of a broader solution framework; availability as standalone offerings may vary by region and engagement type.
